# Who Are We?

## Engonus: Leaders in ERP and IIOT Innovation

Introducing Engonus, a company dedicated to transforming traditional hardware into integrated service solutions, using advanced **ERP technology** to revolutionize business management

# Features of Our Software

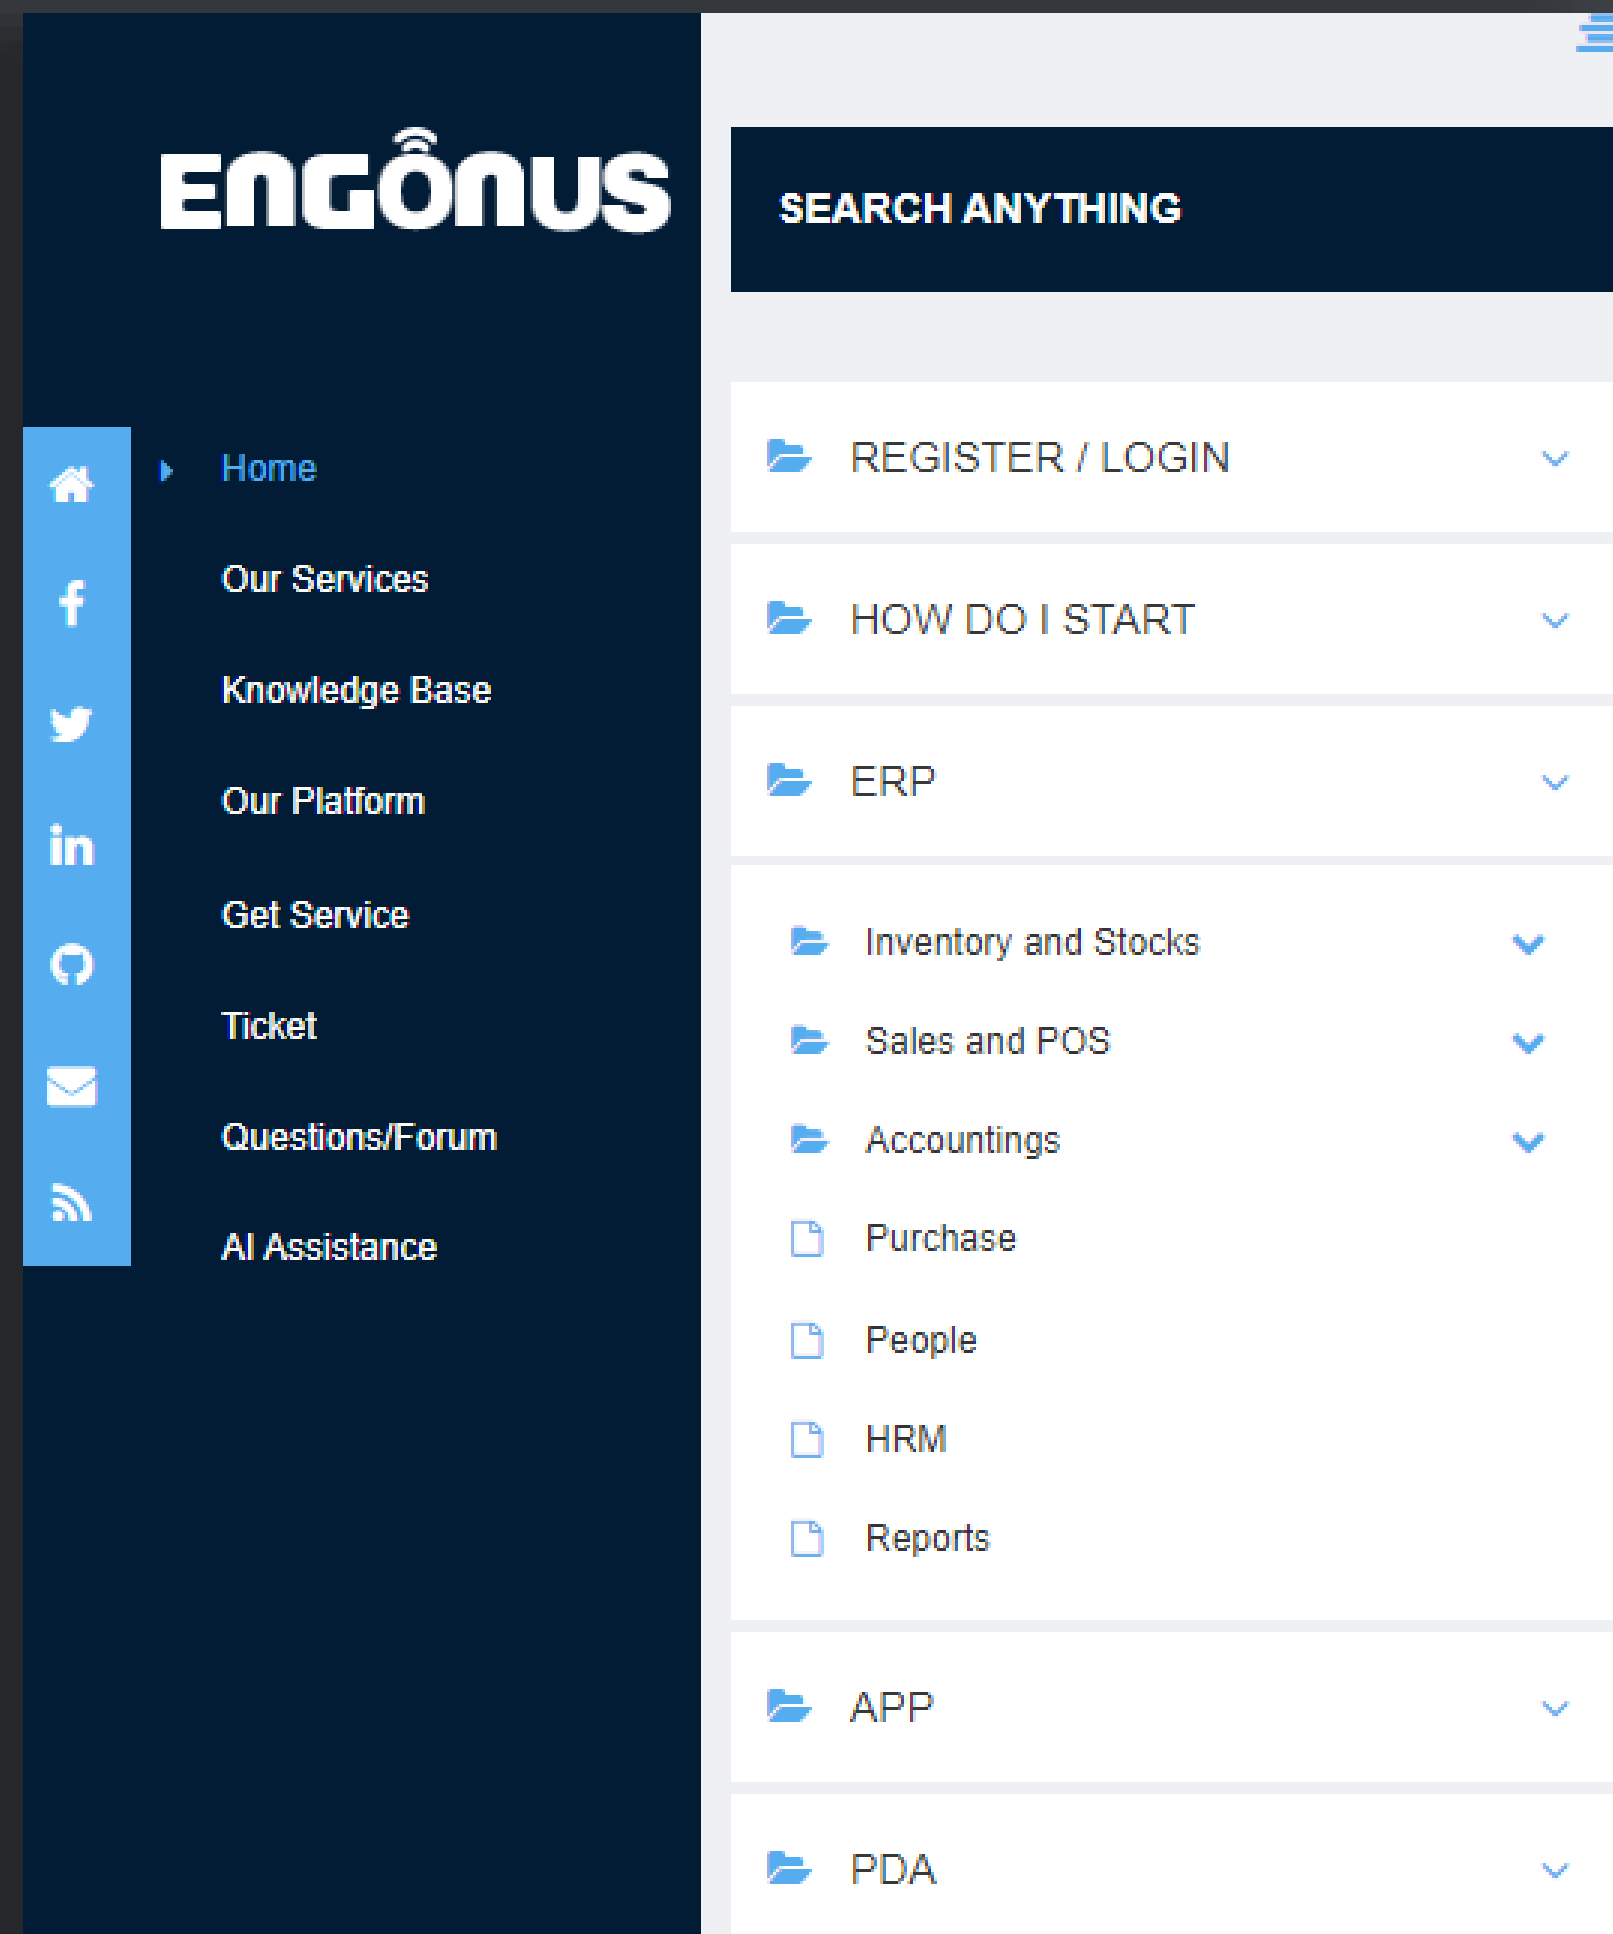

## Native Data and Function Integration

At Engonus, we natively integrate data emitted by the manufacturer's hardware, leveraging functions like code scanning and data reception, and incorporate all this into our ERP system and native app. This ensures perfect synergy between the hardware and our software, maximizing efficiency and utility for the end user

# List of Integrated Features

## ERP

### Inventory Management

Real-time control and tracking of inventory

### Sales and Purchases Management

Automation and simplification of sales and purchase processes.

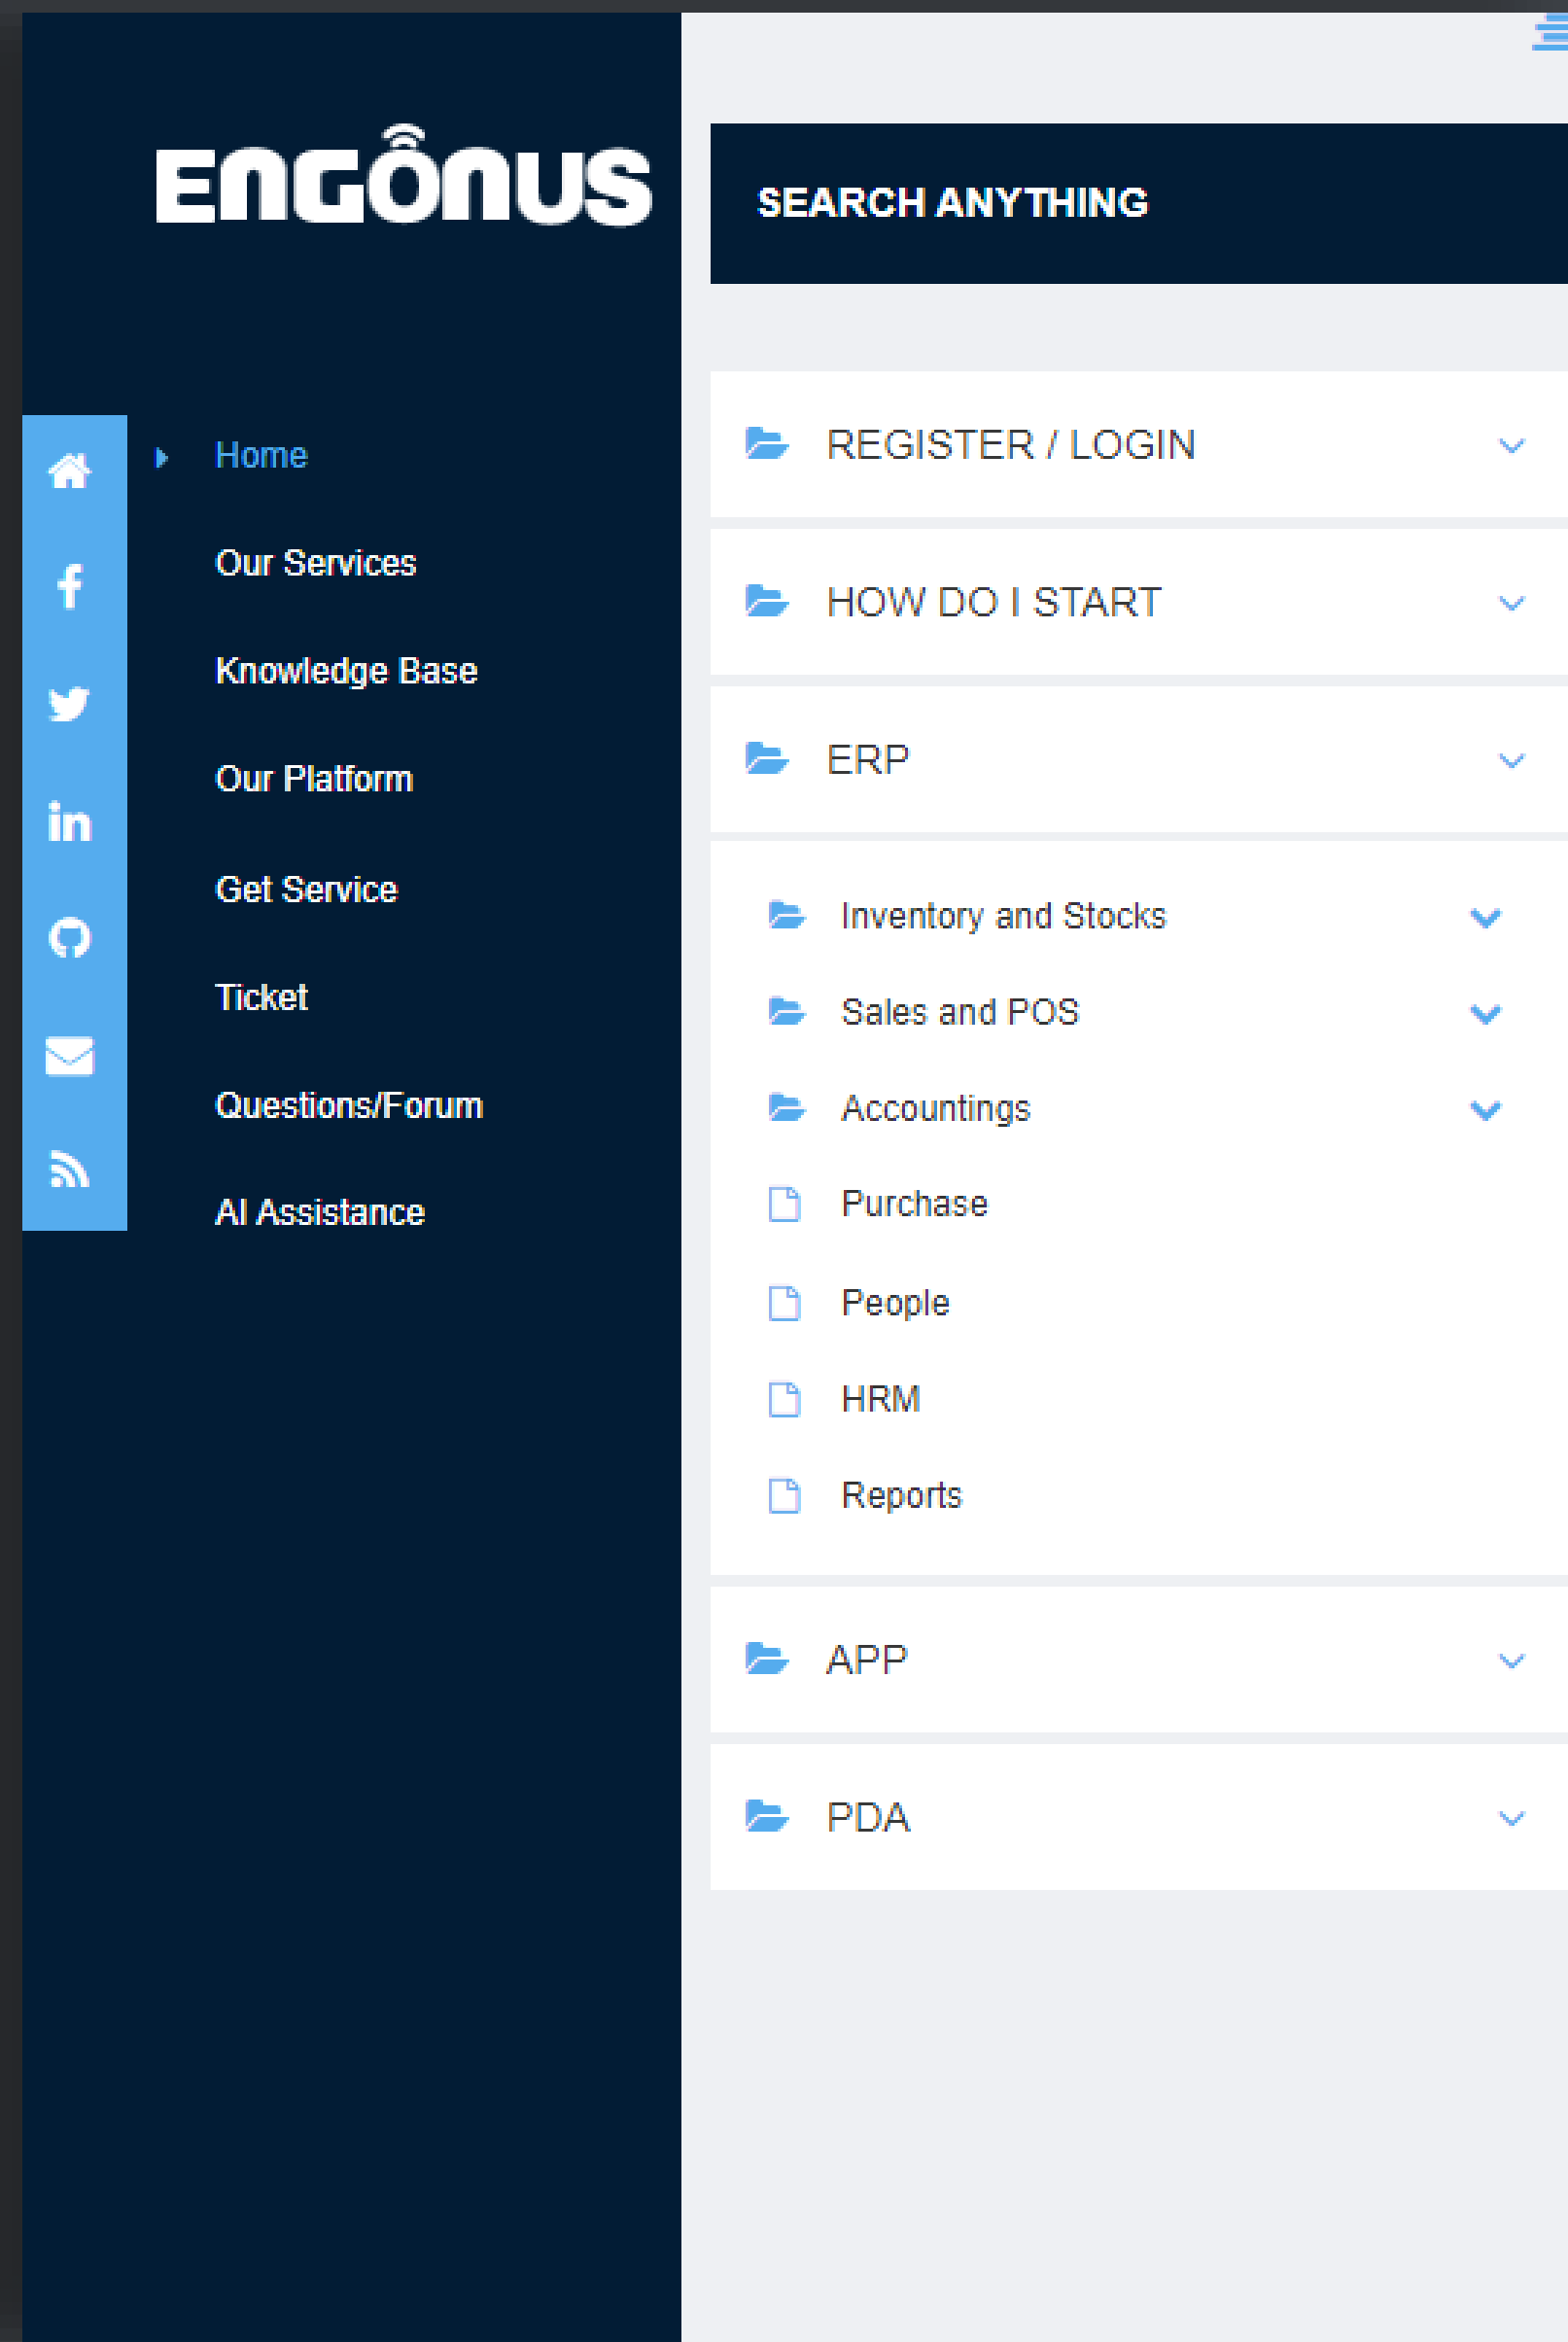

### Human Resources Management

Effective tools for personnel administration

# ≡ Benefits of the Alliance

Added Value to  
Your Hardware

Our software transforms your hardware into a complete service solution, increasing its market value.

Optional Solutions  
for Clients

We offer solutions that allow clients to use the purchased hardware with their own systems, enhancing the utility and versatility of the hardware

Promotion and  
Visibility

We detail how Engonus will promote your products on our website and other channels, increasing your global market visibility

# Partnership Process

Engonus.es

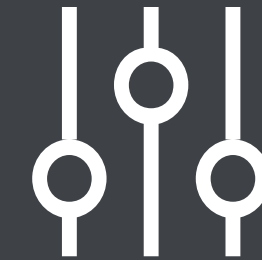

## Agreement

We provide free incorporation of our software into your hardware

## Adaptation and Integration

Our team takes care of all necessary adaptations and integrations, in constant coordination with the manufacturer

## Incorporation into Portfolio

Once integration is complete, we add your hardware to our product portfolio and websites

## Marketing Campaign

We create and execute a specific marketing campaign, targeted at our key markets

## Dropshipping Sales Model

We sell the hardware under a dropshipping model, allowing the manufacturer to directly know their customers

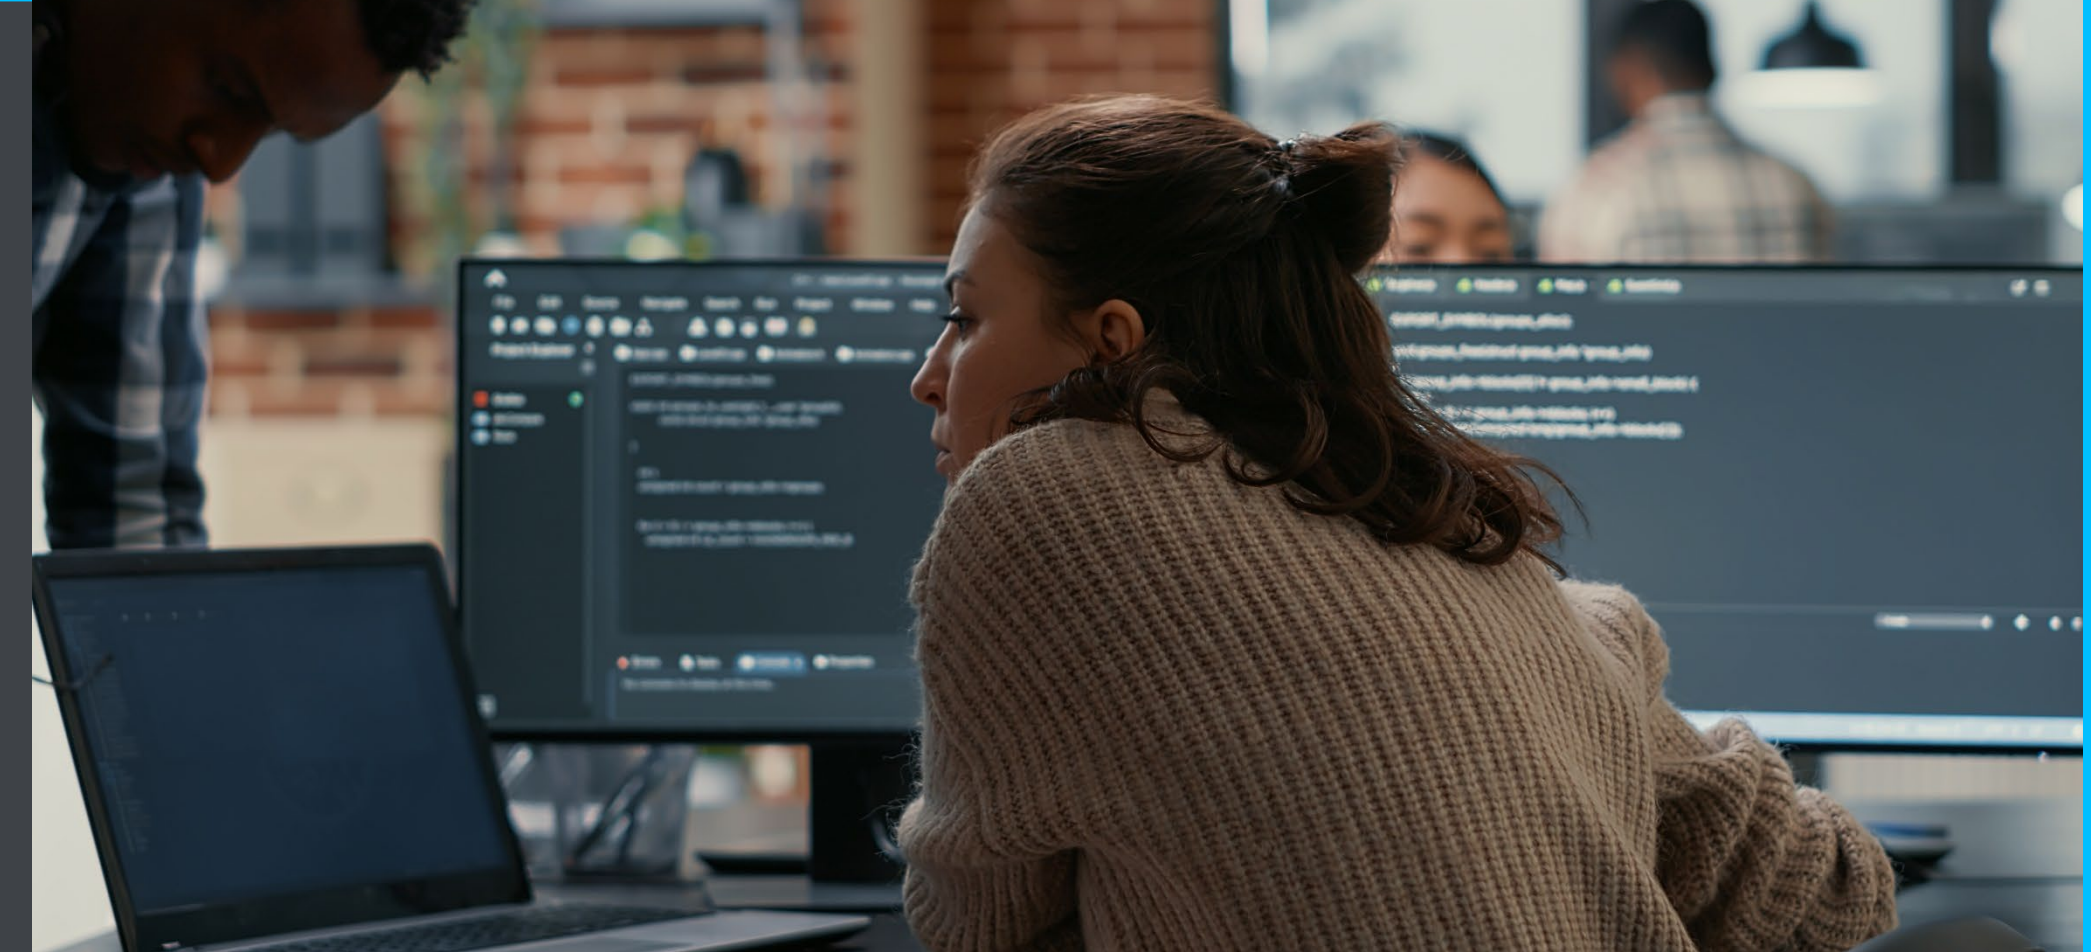

# ” Innovate and Expand with Engonus
